BUSINESS ANALYSIS | IMPLEMENTATION | WORKFLOW AUTOMATION | AI WORKFLOWS

EXPERIENCE

FDM Group, New York, NY Aug 2026 – Present

Change & Transformation Consultant

- Completed an eight-week, four-sprint Change & Transformation Skills Lab covering business analysis, Agile/Scrum, SAFe, RAID and governance, Excel, Power BI, SQL and applied AI.
- Produced requirements, process maps, user stories, stakeholder analyses and Agile delivery artifacts through training case studies.
- Provided onsite and remote support at Computershare's Copilot Hackathon, troubleshooting Copilot Studio workflows, connectors and environments; built Power Automate integrations, co-developed a newsletter-agent prototype and escalated complex issues to specialists.

Amazon, Hazleton, PA Jun 2025 – Aug 2025

Area Manager Intern

- Investigated inbound process bottlenecks using performance and downtime data, root-cause analysis and input from frontline teams.
- Collaborated with Operations, RME and IT to assess constraints and develop a phased improvement proposal and projected business case, with an estimated 10–15% throughput increase from underutilized capacity.
- Presented the proposal, including safety, cost and rollout plans, to cross-functional stakeholders.

Amazon, Melville, NY Oct 2024 – Aug 2026

Warehouse Associate / IT Superuser

- Provided first-line IT support for warehouse operations, troubleshooting thin clients, monitors, scanners and other hardware used by frontline associates.
- Diagnosed incidents, resolved hardware issues where possible, and created or escalated tickets; performed daily equipment-readiness audits and on-call floor support.

DvzzPins, East Elmhurst, NY Dec 2020 – Oct 2022

Founder

- Founded and operated a Shopify e-commerce business, coordinating product development, designers, suppliers, inventory, launches and customer communications.
- Took designs from sketch to finished product with a designer and manufacturer; launched them as limited drops, with four designs selling out and 40 orders on the first launch day.

PROJECTS AND LEADERSHIP

Tetsu Workout Planner Sep 2026 – Present

AI-assisted product project, in ongoing development

- Defined and prioritized user workflows for a workout-tracking app, including plain-text routine import with review, offline logging, progress forecasts and data export, and wrote the acceptance criteria.
- Directed AI coding assistants to build and iterate on the app; shipped a live, installable web app backed by 75 automated tests, 61 browser test cases and a 13-case validation matrix that found and fixed three defects.

Braven Accelerator, Team Lead Aug 2023 – Dec 2023

- Coordinated timelines, task allocation, user research and the final presentation for a university app redesign; the team won the Fall 2023 Capstone Challenge.

SKILLS

Business Analysis: Requirements elicitation and analysis, user stories, acceptance criteria, process mapping, stakeholder analysis, root-cause analysis

Project Delivery and Operations: Project coordination, implementation planning, Agile/Scrum, SAFe, RAID documentation, process improvement, operational readiness, supplier coordination, incident triage

AI and Workflows: AI-assisted workflows and analysis, AI-assisted prototyping, workflow design, human-in-the-loop AI, document-grounded AI agents

Tools: SQL, Excel, Power BI, Microsoft 365, Microsoft Copilot Studio, Power Automate, Shopify | **Language:** Spanish (fluent)

EDUCATION

The City College of New York, New York, NY | BA in Management and Administration September 2026

Magna Cum Laude | GPA: 3.5
